# 206. 反转链表

https://leetcode.cn/problems/reverse-linked-list/description/

给你单链表的头节点 head ,请你反转链表,并返回反转后的链表。

#### 示例 1:

输入: head = [1,2,3,4,5]

输出: [5,4,3,2,1]

## 示例 2:

输入: head = [1,2]

输出: [2,1]

#### 示例 3:

输入: head = []

输出: []

## 提示:

- 链表中节点的数目范围是 [0,5000]
- -5000 <= Node.val <= 5000

进阶:链表可以选用迭代或递归方式完成反转。你能否用两种方法解决这道题?
